1-YEAR SEA TOW® MEMBERSHIP
with purchase of Nightwave

\$249
VALUE ADD

TAKE THE DARKNESS OUT OF NIGHT.

Nightwave is an ultra low-light marine navigational camera built around SIONYX's patented Black Silicon CMOS sensor. It allows mariners of all levels to easily spot obstacles and debris in moonless starlight without white light or expensive thermal cameras—navigating safely, avoiding collisions, and maximizing time on the water. With flexible mounting options and easy setup, Nightwave connects to other hardware via analog output, displaying clear color digital night vision.

Nightwave Digital delivers unmatched clarity—even in moonless starlight—thanks to the enhanced IP (PoE) digital connectivity and advanced Black Silicon CMOS sensor, outshining traditional thermal cameras. Nightwave Digital offers higher resolution, greater reliability, and seamless integration with networked MFD systems. With flexible mounting options and an intuitive setup, it's built for captains who want safety without complexity.
