

## How old are my Andersen winches? Which kind of electric or hydraulic drive unit will fit?

On all Andersen winches the production year, month and version no. [YY-MM-VER.] are stamped on the top side of the deck flange, between the mounting bolt holes. You'll find it, when the polished winch drum is removed.

This base stamp should always be informed to your Andersen dealer, when inquiring or ordering powered refitting drive units (Conversion Kits), Service Kits or any regular spare parts.

NB. On very early models, a similar date stamp was placed on the bottom side of flange.

*EXAMPLE:*

YEAR **02** = 2002  
MONTH **07** = JULY  
**V12** = VERSION 1.2
