

PANTHER™

550101A ELECTROSTEER – SALTWATER MODEL

This ElectroSteer is well-suited for use with kicker motors without a steering tube, or where space constraints will not allow the use of a Panther T4 or T5. Steering is as simple as pressing a button. The connecting rod between the ElectroSteer and the kicker motor easily disconnects. Controlled by a remote on a 24-foot cable and powered by your boat's 12-volt battery.

Features:

- Constructed of black anodized aluminum
- Includes relay control and harness
- Left/right push-button remote
- "Z"-shaped bent rod
- Ball stud assemblies
- Quick disconnects
- Complete with all instructions and operator's manual.

Overall Dimensions:

- 18" x 10" x 4"
- Weight: 9 lbs

Popular Add-On:

A popular option is to combine your ElectroSteer steering with the throttle control of our wireless TrollMaster. The **TrollMaster Pro Angler** lets you control both steering and throttle with ease.
